

[SCROLLBAR-LESS CONTROL BUTTON AND METHOD]

Abstract of Disclosure

Control button and method without using a scroll bar. A scrollbar-less control button is used to control page up, page down, page left, page right, and page flip, allowing the user to control the functions of the control button within a restricted range. Therefore, not only is the range for dragging the mouse up or down, left or right reduced, but the available space of user window interface is also greatly increased.
